Summary

Computer Engineering student specializing in Artificial Intelligence and Machine Learning with strong expertise in backend and full-stack development. Experienced in architecting scalable web applications using Next.js, TypeScript, Node.js, FastAPI, and PostgreSQL. Skilled in designing RESTful APIs, multi-tenant systems, authentication workflows, and AI-integrated platforms. Passionate about system design, performance optimization, and production-grade deployments.

Experience

Software Intern

Jan 2026 – Present

Arkaana.ai

Pune, Maharashtra

- Architected and contributed to a scalable multi-tenant HR management platform using **Next.js** and **FastAPI**, supporting secure organizational data isolation.
- Developed and documented **RESTful APIs** for employee lifecycle workflows and hierarchical **RBAC-based authorization**.
- Implemented **Supabase authentication** with tenant-level access policies to enforce strict data segregation across multiple organizations.
- Optimized backend performance through query tuning and efficient schema design, reducing API response latency.

Projects

KrishiAI – AI Powered Farmer Assistance Platform | *Next.js, TypeScript, Gemini API, Tailwind CSS* Jan 2026

- AI-driven crop diagnosis system leveraging Gemini API to analyze plant images and generate disease predictions with confidence scoring.
- Built a recommendation module providing treatment guidance and estimated cost analysis for farmers.
- Integrated live weather forecasts and market price tracking to support informed agricultural decisions.
- Multilingual support (English, Hindi, Marathi) to enhance regional accessibility.
- Designed a responsive dashboard for crop scan history and activity monitoring.

Car Rental Platform | *React, Node.js, Express.js, MongoDB, REST APIs*

Nov 2025

- Engineered a full-stack rental marketplace supporting User, Vendor, and Admin roles with secure access control.
- Date-range conflict detection logic to eliminate double bookings and ensure accurate availability validation.
- Secured the system using JWT-based authentication and encrypted password storage with bcrypt.
- Integrated ImageKit CDN for automated media compression and WebP conversion, reducing image size by 60–70%.
- Analytics dashboards to monitor booking trends, revenue metrics, and operational insights.

SwasthAI – AI Powered Nutrition Platform | *Next.js, Supabase, Gemini API*

Feb 2026

- Personalized diet recommendation engine using Gemini API based on user health metrics and goals.
- Implemented macro tracking for calories, protein, carbohydrates, fats, and hydration monitoring.
- Integrated Google OAuth authentication with Supabase and secured user data using role-based authorization.

Blogging Platform | *React, TypeScript, Cloudflare Workers, Prisma, PostgreSQL*

Sep 2025

- Built a distributed blogging application enabling secure content creation and publication.
- Utilized Cloudflare Workers for edge-based backend execution with JWT authentication and schema validation.
- Modeled relational data using Prisma ORM to ensure efficient queries and data consistency.

Technical Skills

Languages: TypeScript, JavaScript, Python, C/C++, SQL

Frameworks: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS

Databases: MongoDB, PostgreSQL, MySQL

Cloud & Tools: AWS, Cloudflare, Docker, Git, REST APIs

Education

G.V. Acharya Institute of Engineering & Technology

Oct 2022 – Jun 2026

Bachelor of Engineering in Artificial Intelligence and Machine Learning (CGPA: 7.33)

Maharashtra

Leadership & Extracurricular

Competitive Programming

2024 – Present

LeetCode

- Solved 150+ data structures and algorithms problems covering arrays, trees, graphs, dynamic programming, and system design patterns.
